Target Android Devices

Select the form factors your app will run on

Different platforms may require separate SDKs

Phone and Tablet

Minimum SDK

Lower API levels target more devices, but have fewer features available.

By targeting API 23 and later, your app will run on approximately 4.7% of the devices that are active on the Google Play Store.

Zusatzaufgabe

Android Exercise - Another Activity

19 MARCH 2017 by Mark Price

Requirements

1. Create a 3rd activity called *SettingsActivity* that can be accessed from the *MainActivity* (maybe with a gear icon)
2. There will be a checkbox called *Night Mode*
3. If the user turns on *Night Mode* all of the background colors in the *MainActivity* and the *DetailsActivity* turn dark grey
